

FLOSS untuk Berkarya di Dunia Kerja

Sebagai Karyawan & Pekerja Lepas

Dibawakan Oleh : **Ibnu Hajar Asqolani**

Ibnu Hajar Asqolani

Perkenalkan nama saya Ibnu Hajar Asqolani, Asli Jakarta dan saya kelahiran tahun 1992. Saat ini saya memiliki beberapa pekerjaan yang sedang saya geluti

- **UI UX Designer** Indonetwork.co.id
- **UI UX Design Mentor** Cakap Institute
- **Merintis Usaha** dengan Nama Babaibnu

Awal Berkenalan dengan FLOSS

Dulu saya pernah bekerja di salah satu perusahaan travel jakarta-bandung sebagai Call Center dan seiring berjalan waktu mulai ramai isu akan ada sidak tentang legalitas perangkat lunak yang digunakan diperkantoran. Mulai dari situ sesekali IT Support datang ke ruangan untuk menginstall ulang satu persatu komputer untuk mengganti dari Windows XP ke linux, seingat saya versi 10. Dan saat itu baru saya menyadari bahwa ada sistem operasi lain selain windows.

Distro Linux

Mulai dari situ saya mulai mencari-cari informasi tentang linux dan mencoba berbagai macam distro yang menarik secara tampilan misalnya Deepin, Elementary, Cutefish(beta) & yang paling sering digunakan adalah Ubuntu.

Aplikasi Pengganti

Migrasi ternyata tidak mudah, karena saat menggunakan software bajakan dahulu saya terbiasa membuat desain menggunakan Freehand 9. Di linux ternyata tidak tersedia dan jika harus memaksakan bisa menggunakan Win. Dengan Wine pastinya tidak akan optimal dan sudah pasti harus membeli lisensi terlebih dahulu. Maka dari itu perlu mencari software alternatif atau yang semisal fungsinya dengan yang biasa kita gunakan di OS selain linux.

Adobe Illustrator Alternatives

Adobe Illustrator is a vector graphics editor that allows you to increase or reduce the size of images without affecting their quality, contrary to what happens in the case of images created or edited in bitmaps or pixels with software such as Adobe Photoshop or GIMP. This is useful for producing visual content for digital art or as a print template for large formats. However, its high price, restrictive monthly subscription model, and unstable performance often make Illustrator simply not the best option for all. That's why we would like to recommend you a list of alternatives for editing vector graphics that may better fit your needs.

Adobe Illustrator alternatives are mainly [Vector Graphic Apps](#) but may also be [Digital Painting Tools](#) or [Image Editors](#). Filter by these if you want a narrower list of alternatives or looking for a specific functionality of Adobe Illustrator.

Unlike Illustrator, Inkscape is completely free and open source, and it uses Scalable Vector Graphics (SVG) as its native format. This lightweight app is usually recommended if you don't have a powerful computer, as it also has many of the useful features from Illustrator, including layers, grouping objects, drawing, shape, calligraphy, pencil tools, path simplification with variable threshold, bitmaps, and boolean operations. Plus, you can open or import a wide range of file formats including SVG, PDF, EPS, CDR, or even AI (Adobe Illustrator).

Xamarin

The screenshot shows the Visual Studio Community 2017 for Mac interface. On the left, the Solution Explorer displays a project named "HelloAndroid" with files like MainActivity.cs, package.config, and HelloAndroid.UITests. The main code editor window shows the C# code for MainActivity.cs:

```
1  using Android.App;
2  using Android.Widget;
3  using Android.OS;
4  using Android.Support.V7.App;
5  using Android.Preferences;
6  using System;
7  using Java.Lang;
8  using Android.Util;
9  using Android.Graphics;
10
11 namespace HelloAndroid
12 {
13     [Activity(Label = "Calculate PI", MainLauncher = true, Icon = "@mipmap/icon")]
14     public class MainActivity : AppCompatActivity
15     {
16         private readonly string TAG = typeof(MainActivity).Name;
17         EditText editDigits;
18         TextView tvResult;
19         protected override void OnCreate(Bundle savedInstanceState)
20         {
21             base.OnCreate(savedInstanceState);
22
23             // Set our view from the "main" layout resource
24             SetContentView(Resource.Layout.Main);
25
26             // Get our button from the layout resource,
27             // and attach an event to it
28             Button button = FindViewById<Button>(Resource.Id.myButton);
29             editDigits = FindViewById<EditText>(Resource.Id.etDigits);
30             tvResult = FindViewById<TextView>(Resource.Id.textResult);
31
32             button.Click += delegate { CalculatePi(button); };
33         }
34
35         void CalculatePi(Button button)
36         {
37             double digits = Double.Parse(editDigits.Text);
38             double pi = Math.PI;
39             tvResult.Text = pi.ToString("N" + digits);
40         }
41     }
42 }
```

At the bottom of the code editor, tabs for Source, Changes, Authors, Log, and Merge are visible. To the right of the code editor, a mobile phone icon displays a calculator application titled "Calculate PI". The app has a blue header with the title and a white body with a red input field containing the number "4". Below the input field is a grey button labeled "CALCULATE PI". The result "3.1429" is displayed below the button.

PT. Pastindo Prima Label
Spesialis Percetakan Label & Stiker

Profil Perusahaan

PT Pastindo Prima Label mulai menjalankan bisnisnya pada tahun 2012 hingga saat ini. Pastindo Prima Label membuat dan menyediakan kebutuhan Label/Sticker dan Ribbon dengan kualitas tinggi dan harga terjangkau untuk keperluan konsumen hingga bisnis perusahaan (B2B).

 [pastindoprimalabel](https://www.facebook.com/pastindoprimalabel)

Produk Kami

PT. Pastindo Prima Label menyediakan bermacam-macam jenis label / sticker, seperti label Semi Coated, Cromo, HVS serta bahan plastik seperti Vinyl, Yupo, Hologram serta beraneka macam label.

Semi Coated

Jenis label barcode dengan karakteristik (Coated) pada lapisan paling atas dari label. Lapisan ini berfungsi untuk menutup pori-pori pada label sehingga pada saat pencetakan menggunakan printer barcode, unsur karbon pada ribbon dapat dicetak dengan sempurna.

Cromo

Stiker yang berbahan dasar kertas dan lebih murah. Stiker cromo cocok untuk label kemasan makanan kering dan tidak disarankan untuk makanan basah atau disimpan dalam kulkas.

Mengapa Memilih Kami?

Fast Respon

Service dan layanan kami yang cepat untuk memudahkan kebutuhan pelanggan kami.

Harga Kompetitif

Kami memberikan harga yang sangat kompetitif untuk memenuhi kebutuhan label anda.

Material Berkualitas

Material berkualitas yang kami gunakan tentunya akan menghasilkan produk yang berkualitas pulo.

Spesialis Percetakan Label &

Penpot App

The screenshot shows the Penpot application interface, which is a wireframing tool for creating user interface designs. The main area displays a wireframe of a 'Cover' page from a 'Material Design Kit'. The wireframe includes several UI components such as a top navigation bar with icons for Favorites, Search, Information, and Notification, each with an 'Enabled' status switch. Below this are three rows of cards, each featuring a small image, a title ('Headline 6'), and a subtitle ('Body 2'). To the left of the wireframe is a sidebar with sections for 'Pages' (containing 'Cover', 'Getting started', 'Material theme', and 'Components') and 'Components' (containing 'Cover'). On the right side, there is a panel for 'Design' and 'Prototype' tools, and a color palette at the bottom showing color swatches for 'High Emphasis' (Primary, White), 'Medium Emphasis' (Primary, White), 'Disabled' (Primary, Black), and '38%' (Primary, Black).

Kalau sudah ada uang kenapa tetap pakai FLOSS?

Sebagai yang terbantu bertahun-tahun berkarya menggunakan FLOSS maka saya ingin juga orang lain merasakan apa yang saya rasakan, saya ingin mereka meninggalkan software bajakan baik sistem operasinya maupun perangkat lunak untuk keperluan kerja sehari-hari. Maka dari itu saya berusaha menyisihkan waktu untuk berkontribusi

Kdenlive

The screenshot shows the Kdenlive video editor interface. The top menu bar includes File, Edit, View, Project, Tool, Clip, Timeline, Monitor, Settings, and Help. The toolbar below has options for New, Open..., Save, Undo, Redo, Copy, Paste, and Render... A search bar is also present.

The left sidebar displays the Project Bin with the following items:

- 20221020_082855-30fps.mp4 (00:00:36:10 [3])
- 20221020_083027-30fps.mp4 (00:00:11:13 [1])
- 20221020_083045-30fps.mp4 (00:00:10:23 [1])
- Lebih Spesifik Maka Akan Lebih Baik (00:00:05:00 [1])
- Recording (113).m4a (00:22:58:15 [7])
- Siapa Target Market Anda.png (00:00:05:00 [1])

The main workspace shows a video clip titled "20221020_083045-30fps.mp4" featuring a hand pointing at various colorful toothpaste tubes. The timeline below shows the project structure with tracks for Video (V1, V2), Audio (A1, A2), and Master. The current frame is labeled "In Point".

The right side of the interface features a preview window displaying a graphic with the text "Siapa Target Market Dari Usaha Anda" in Indonesian, overlaid on a blue and yellow background.

The bottom right corner shows the Audio Mixer and Effect/Composition Stack panels.
